

Department of Immunobiology
Graduate Student Research Seminar Series
Fall 2008
Medical Research Building, Room 102

Aug 29 **10:00 - 11:00am** **Orientation**

Sep 12 **10:00 - 11:00am** **Kathleen Corcoran**
Title: "Adapter Mediated Substrate Selection in ER-associated Degradation by a Viral Ubiquitin Ligase"

Oct 10 **10:00 - 10:30am** **Maria Ordaz**
Title: "Priming Immune Responses with MHC I Single Chain Trimer Vaccines"

10:30 - 11:00am **Collin LaCasse**
Title: "Inhibition and Depletion of Regulatory T Cells for Cancer Immunotherapy"

Oct 17 **10:00 - 11:00am** **Vuna Fa**
Title: "T-cell Development in Microgravity and Expression of Space-Flown Thymocytes."

Oct 24 **10:00 - 11:00am** **Cheryl Myers**
Title: "Immunogenic Characteristics of Tumor Derived Peptides"

Nov 21 **10:00 - 10:30am** **Rajalaksmy Ramalingam**
to be held Title: "Importance of TGF-beta Signaling in Dendritic Cells in Inflammatory
in BIO5 (Keating) Bowel Diseases."
Room 103

10:30 - 11:00am **Sharese Bailey**
Title: TBA

Nov 28 **NO SEMINAR** **Thanksgiving**

Dec 05 **10:00 - 11:00am** **Jianhua Wang**
Title: "JP-8 Immunotoxicity and Wound Healing Studies"

IMB students are required to attend and faculty are urged to attend all seminars.

* Dates are subject to change
